

FOR IMMEDIATE RELEASE
Big Fish Audio and Ueberschall

(Valencia, CA, January 18th, 2007.) Big Fish Audio announces its new partnership with Ueberschall. Big Fish Audio will be the exclusive North American distributor of the entire Ueberschall product line.

Located in Valencia California, Big Fish Audio is the largest distributor of sample libraries in the world. “We have been interested in Ueberschall’s products and technology for quite some time. This new distribution relationship will strengthen both our companies, and provide our customers with more and better sample options,” says Tom Meadows, President of Big Fish Audio.

Ueberschall Sample Service GmbH, based in Hannover Germany and founded in 1989 by CEO Uwe Kinast, has so far released over 100 sampling products. Ueberschall also makes highly acclaimed intelligent virtual player instruments such as Elastik Player and Liquid Instruments. The Liquid Instrument Series is produced in close cooperation with Celemony Software GmbH (Melodyne).

“This is an exciting new development for us.” states Uwe Kinast, CEO and founder of Ueberschall. “Big Fish Audio is going to be a good fit. Our two companies have the same emphasis on high quality sample products. Taking advantage of Big Fish Audio’s distribution network and skills is a great opportunity for us to bring our ‘intelligent’ libraries, virtual players and construction kits to the North American markets.”
