

Thank you for buying Big Fish Audio's Raging Guitars.

A new version of Raging Guitars is now available for free download, adding Intel Macintosh compatibility and a new onscreen interface as well as various fixes and enhancements.

To install Raging Guitars and receive the new features, please follow the instructions below.

If you are a new Raging Guitars user, or are installing the library on a new computer, you should follow all steps.

If you are updating a computer which has a previous version of the library, you should begin with step 4 and continue to the end.

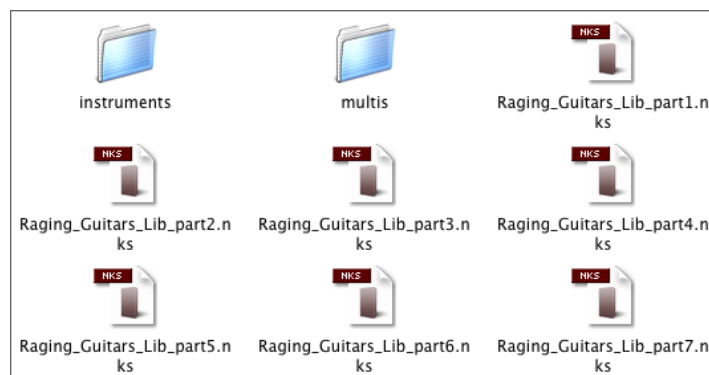

### **STEP 1: INSTALLING FROM THE DISC**

Insert disc 1 into your computer and run the installer. You will be asked for your serial number; use the original serial number on the sticker found in the inside of your Raging Guitars DVD box.

The installer will first install the software and then ask you where you would like to put the 11GB sample content (the library). You may choose any internal or external hard drive.

### **STEP 2: COPY THE SAMPLES (NKS FILES) TO YOUR LIBRARY LOCATION**

Start with disc 1, which contains the first two NKS files, and copy the two NKS files into the new Raging Guitars library folder. They should sit alongside the multis and instruments folder. When they have finished copying, insert discs 2 and 3 and do the same. Once this is finished, your installation folder should contain an instruments folder, a multis folder, and the seven NKS files:

### STEP 3: REGISTER THE ORIGINAL VERSION OF RAGING GUITARS

Run the included Registration Tool (found in the Applications/Big FishAudio/Raging Guitars folder for Mac users, or Program Files/Big Fish Audio/Raging Guitars folder for PC users) and follow its instructions to register your copy of the original version of Raging Guitars.

### STEP 4: DOWNLOAD THE UPDATE AND GET A NEW SERIAL NUMBER

Visit the NI Updates page here:

[http://www.native-instruments.com/index.php?id=updates\\_us](http://www.native-instruments.com/index.php?id=updates_us)

Select BIG FISH AUDIO – RAGING GUITARS and click the Sendbutton.

BIG FISH - Raging Guitars KP1 Win & Ma

Do not display files that I have already downloaded. send

Download	Info	Date	Filesize
<a href="#">Big Fish Raging Guitars KP2 2.2.0 Mac OS X Update</a>	<a href="#">What's this ?</a> Update	13 Feb 2007	73.8 MB
<a href="#">Big Fish Raging Guitars KP2 2.2.0 Win Update</a>	<a href="#">What's this ?</a> Update	13 Feb 2007	45.6 MB
Serial number for Big Fish Raging Guitars KP2 2.2.0: Click the "What's this"/Info link!	<a href="#">What's this ?</a> Update	13 Feb 2007	
<a href="#">Bigfish Raging Guitars 1.1.8.3 Update</a>	<a href="#">What's this ?</a> Update	21 Jun 2005	11.4 MB
<a href="#">Bigfish Raging Guitars 1.1.8.3 Update</a>	<a href="#">What's this ?</a> Update	21 Jun 2005	8.8 MB

A panel will appear (shown above) with all available updates for Raging Guitars. Select the KP2 update for Mac or PC, and it will begin downloading.

In addition, you will also need to find the “Serial Number for Big Fish Raging Guitars KP2 2.2.0” item and click the “What’s This?” button next to it. This will trigger the system to generate a new serial number unique to the new Kontakt Player 2 upgrade. This will be e-mailed to you.

## STEP 5: RUN THE UPDATE INSTALLER

Run the newly downloaded update installer. It will ask you for the new serial number (the one you requested in Step 4). The installer will write updated files to the same location as your original installation (step 1).

The installer will also ask if you want to start the NI Service Center installation. You should click yes; you will soon need to authorize the new version of the library, separate from the old one.

## STEP 6: AUTHORIZE THE UPGRADED VERSION OF THE LIBRARY

Launch the NI Service Center (located in your Applications folder if you are a Mac user, or the Program Files folder if you are a PC user) and follow its instructions to properly authorize the new version of Raging Guitars.

## SPECIAL NOTE

Note that the upgrade process does not remove the earlier installation of Raging Guitars. This means that you may see the Raging Guitars plug-in in your host. This is the previous version. In order to use the newest version, locate the Kontakt Player 2 plug-in, and the new Raging Guitars library will be accessible from within it.

If you wish to completely remove the old version, it is safe to do so and can be done by manually removing the following files:

Mac users:

/Library/Audio/Plug-ins/Components/RagingGuitars.component  
/Library/Audio/Plug-ins/VST/RagingGuitars.vst  
/Library/Application Support/Digidesign/Plug-Ins/RagingGuitarsRTAS  
/Applications/Big Fish Audio/Raging Guitars\*

*\*note that you can delete this entire folder, as long as your library is not stored in it. If your library is stored in it, you should first move the library elsewhere.*

PC users:

C:\Program Files\Common Files\Digidesign\DAE\Plug-Ins\RagingGuitarsRTAS.dpm  
C:\Program Files\VSTPlugins\Raging Guitars VST plug-in (location may depend on VST hosts)  
C:\Program Files\DXiPlugins\Raging Guitars DXi plug-in (location may depend on DXi hosts)  
C:\Program Files\Big Fish Audio\Raging Guitars\*

*\*note that you can delete this entire folder, as long as your library is not stored in it. If your library is stored in it, you should first move the library elsewhere.*

We hope you enjoy using Raging Guitars!
